We Try Harder to Stay First

Overview

The Talal Abu-Ghazaleh Languages Academy (TAGLA), one of the many academies at the Talal Abu-Ghazaleh College of Business-German Jordanian University (TAGCB-GJU), has been established in order to promote language proficiency.

With intercultural communication skills becoming increasingly significant in a world that is becoming more global, our goal has been to offer our participants a unique atmosphere to study some of the most widely spoken languages worldwide such as, English, Arabic, French, German and Italian.

Why TAGLA?

Since its inception, TAGLA has become a popular choice for many students, thanks to the many facilities it offers to ensure students' comfort and satisfaction. Here is what makes TAGLA a unique option for a language study:

- Distinguished language teaching approach
- High caliber staff
- Convenient class size that allows individualized attention
- Accreditation as an attached centre for the University of Cambridge ESOL Examinations
- Highly equipped labs with e-Learning software

Teaching Staff

The teaching staff at TAGLA enjoy both in-depth and lengthy experience in teaching languages to foreign students. Not only are they there to teach the language itself, but are also qualified to help students explore the intricacies of the language of their choice, along with its related cultural, historical and societal aspects.

Outcome

Upon completing the language program, participants should be able to express themselves eloquently and clearly in the language they have studied and directly apply their newly acquired speaking, reading, listening and writing skills in their everyday life and professional environments.

Our Language Lab

The Language Lab is an important and necessary system that compliments the language learning process. The Multimedia Language Lab at TAGLA consists of high quality advanced multimedia classroom tools, utilized to make the teaching process much easier.

This lab uses the latest technology microprocessor-based system for effective language learning and interactive classroom. TAGLA ensures that technological resources are efficiently integrated into the teaching process in order to enhance the overall language learning experience of participants.
